---

## ASSETS

---

- CareerFoundry Front End Developer
  - CompTIA A+ IT Certificate
  - Google IT Support Professional Certificate
  - CosmWasm Academy 1<sup>st</sup> Cohort
  - Experience on Web3 Team
  - Member of Web3 Builders Alliance
- 

## EDUCATION

---

**CosmWasm Academy**, *Confio*, Remote

**Web3 Builders Association Bootcamp**, Capstone Submitted, Remote

**CareerFoundry Front End Developer Bootcamp**, 2021, Remote

---

## WORK HISTORY

---

**Moultrie Cryptography**, 2021-2022

At Moultrie Cryptography I have created shell scripts, which are put into python programs, for their Audit Academy. I help to maintain their validator, ranked 42 in the active Akash set, and we have 100% uptime. I also designed their current website and aid prospective clients in the onboarding process. My experience developing their education and documentation program overlaps with ixo's mission to create simple and elegant software, and my experience on a Web3 team attests to ability to work in small groups in the industry.

**Atlas DAO**, 2022

I worked for Jacob Remy, the founder of Atlas DAO, in moving his website over to Akash and helping his team launch a Stargaze validator. This involves knowledge of docker and Stacked Definition Language. I also wrote him programs to tether his validator to holders of his NFT projects, so that they could share in the commission when the functions were called.

---

## ACCOMPLISHMENTS

---

- Built a functioning directory service in CosmWasm to serve as a decentralized Wikipedia, it is live on Juno Testnet  
[https://github.com/tacolopo/allthoughts/tree/main/rome\\_contract](https://github.com/tacolopo/allthoughts/tree/main/rome_contract)

- Validator ranked 42 on Akash Network  
<https://www.mintscan.io/akash/validators/akashvaloper1a50dqn03hpnf2hgrv3da4y8jqnvdz55h68m67p>

- Created automation programs for Moultrie's Audit Academy, one example here  
[https://github.com/tacolopo/audit-academy/blob/main/automated\\_deployments/auto\\_deploy.py](https://github.com/tacolopo/audit-academy/blob/main/automated_deployments/auto_deploy.py)

- Commits in cosmos/gaia, CosmWasm/cw-template, Callum-A/cosmwasm-zero-to-hero, 0xriku/rust-cargo-cheatsheet, osmosis-labs/docs, cosmology-tech/cosmos-kit, ovrcrk/awesome-akash, InterWasm/docs, cosmos/chain-registry, cosmos/sdk-tutorials, ovrcrk/docs, and maxmaxlabs/cloudmos-deploy
